Sub-strategy Description and Justification:

This sub-strategy funds the contract through which the DFPS automation network and operations are managed. To support IMPACT, CLASS, and other business applications, and the entire DFPS technology infrastructure, this contract provides data center management, network and server support, e-mail and help desk services, security, disaster recovery assurances and other automation services.

External/Internal Factors Impacting Sub-strategy:

The ability to collect and maintain accurate information, and the ability to access information timely are critical for quality decision-making. The ability to fund automation maintenance is crucial to the daily operations of DFPS. Any reduction in the responsiveness of the outsourced service provider in addressing caseworker automation problems could reduce a worker's ability to document cases and to provide effective services to clients. A key component of successful program delivery is adequate funding of support functions so that direct delivery staff can concentrate on the delivery of protective services.
